

installation instructions

Installation Instructions for Memory Lane Gallery:

Ensure Prerequisites:

- Ensure you have [Node.js](#) installed (version 14.x or higher).
- Ensure you have [npm](#) installed (comes with Node.js).

Download and Extract the Project:

- Download the project zip file and extract it to a desired directory.

1- Ensure Node.js and npm are installed:

Check if Node.js is installed:

```
bash
```

[Copy code](#)

```
node -v
```

Check if npm is installed:

```
bash
```

[Copy code](#)

```
npm -v
```

2- Navigate to the project directory:

Open your terminal or command prompt and navigate to the root directory of the extracted project:

```
bash
```

[Copy code](#)

```
cd /path/to/extracted/Amy's_Gallery
```

3- Install the required dependencies:

Run the following command to install the required dependencies:

```
bash
```

[Copy code](#)

```
npm install
```

4- Run the application:

Start the application using the following command:

```
bash
```

[Copy code](#)

```
node app.js
```

5- Access the web application:

Open a web browser and navigate to <http://localhost:3000> (or the port specified in app.js).

Development:

If you want to make changes to the code and have the server automatically reload, you can install nodemon:

sh

 Copy code

```
npm install -g nodemon  
nodemon app.js
```

Additional Notes

- Ensure that MongoDB (or any required database) is running if the application depends on it.
- Check the package.json file for any specific scripts or environment variables that need to be set before running the application.
